

STSM Report
Ioan Durnescu

The purpose of the STSM was to work together with prof. Christian Grafl and Christina Enengl (Vienna University) on the joint chapter named Experiencing Supervision. The chapter is a part of the COST book Offender Supervision in Europe.

During the mission we meet and discussed the general approach of the chapter, the main ideas, the structure and we allocated among ourselves different section. The concluding section was the one that took more time than the other sections.

The main result is the chapter that has been submitted to the editors (see the Annex).

During the mission we also discussed about potential activities that would advance knowledge in the field of Experiencing supervision. One idea was to explore the possibility of setting up a Probation barometer that would measure the level of punitiveness in the probation services across Europe. This idea will be presented and analyzed on the Bratislava meeting.
